

HARTMANN

Helps. Cares. Protects.

MediSet®

All necessary components
in one sterile set – supporting
safer and more efficient
patient care practices¹

**MediSet®
helps to keep
infections
out.¹**

- + 18% higher protocol compliance¹**
Complete sets help support patient safety
- + Faster, more efficient procedures¹**
Standardized, pre-packed components in
protocol order – ready when you need them
- + Strengthens infection prevention¹**
Reduced contamination risks through single
sterile environment

HARTMANN

Helps. Cares. Protects.

Up to **62%**

of caregivers report
**insufficient time for
their tasks¹.**

MediSet® helps bridge
this gap.

Saving time and reducing staff stress¹

All needed components in one set –
no time-consuming gathering of many
different components

Reliable availability of sterile products

5 minutes saved per procedure –
proven in controlled studies on central line
procedures

Reduces stress and increases confidence
in time-pressured environments

Faster onboarding for new staff with
standardized processes

Helping to prevent infections¹

**35% reduction in mistakes during central line
procedures** documented in clinical trials

8% increased protocol compliance through
complete sets packed in protocol order

Reduced contamination risks through single
sterile environment

More safety for patients through better
preparation and reduced risk of incorrect or
missing components

Set use in one of the scientifically established
procedures is proven to **reduce bloodstream
infections by up to 70%**

Optimizing resources and cutting costs¹

Streamlined purchasing – single supplier,
simplified inventory

Switching to single-use devices shows a
cost-related benefit and also saves staff time
while supporting infection prevention

Lower infection rates = reduced treatment costs

Time savings translate directly to
resource optimization

Supporting your sustainability goals¹

Less overall packaging and plastic waste
than individual components

Produced and sterilized in the EU –
fewer transport routes and CO₂ emissions

Transport cartons made from

FCS certified material

PVC-free blister packaging
with mineral oil-free ink

Single-use eliminates water, energy, and
chemicals needed for reprocessing of
instruments and trays

ISO 14001 certified production facilities
