

International Infection
Prevention Week: 16.-22.10.2022

Ways to Prevent Infections at a Hospital

Speak up for your care.

If you are having surgery, ask if you should shower with a germ-killing soap ahead of time.

Clean your hands and make sure everyone around you does too.

Take medications as directed.

Sneeze and cough into your elbow, not your hand.

If your room looks dirty, ask to have it cleaned.

Ask about safe injection practices. Remember: One Needle, One Syringe, only One Time.

Every day, ask if you still need your catheter.
